Bug Facts covers useful information about the most commonly found insects in North America, which include butterflies, beetles, ants, wasps, bees, mantids, and many others. Plus a few creatures that are commonly mistaken for insects, but actually non-insects.Topics range from to fun facts for each bug, to general insect development.

Bug Facts Insect Field Guide

This is a solid field guide, but the meager percentage of color pictures is problematic. Beetles are quite colorful and that should be the most salient identifying characteristic, but neither the black & white drawings nor the often color-free descriptions help in that regard -- a real weakness for a guide to these beautiful insects.
