gas is resorbed, the walls of the alveoli collapse in on themselves and the size of the affected area reduces.

Atelectasis (summary) | Radiology Reference Article ...

In simple terms, atelectasis is referred to as a collapsed lung, and this term is fairly accurate. The problem occurs when part or all of the lung collapses, making it impossible for fresh air to reach the alveoli. The alveoli are the small sacs in our lungs that effectively trade oxygen for carbon dioxide.

Atelectasis: 10 Causes of Atelectasis

Atelectasis is a radiopathological sign which can be classified in many ways. The aim of each classification approach is to help identify possible underlying causes together with other accompanying radiological and clinical findings. Atelectasis can be subcategorised based on underlying mechanism, as follows:
