Beyond this, VIX ETFs are known for not being great at mirroring the VIX. One-month ETN proxies captured only about 25% to 50% of daily VIX moves, and mid-term products tend to perform even worse ...

How to Use a VIX ETF in Your Portfolio

Crazy if true, but this VIX chart looks ready to explode IMO. Lots of complacency building up with the stock market being at (or near) all time highs. Meanwhile, bond yields are plummeting, gold is rocketing, and VIX is staying stubbornly high. Determining what information is signal and what is noise is probably the hardest & most important job of a successful trader/investor.
