The well-known American author, Bill Bryson, once said: "Physics is really nothing more than a search for ultimate simplicity, but so far all we have is a kind of elegant messiness." Physics is indeed the most fundamental of the sciences that tries to describe the whole nature with thousands of mathematical formulas.

This is found by using the two main torque equations (equals 90-degree force times distance AND equals MOI times rotational acceleration). From this we can establish equation (2) that involves the tension force; however, this equation also has alpha as an unknown (we're not given angular acceleration of the Yo-Yo).
