Honda Motorcycle Engine Numbers Identification

Look for the serial number on the lower portion of the engine, which is called the crankcase. Newer Honda models (1990 and above) often have it stamped on the rear of the crankcase, usually close to the swing arm pivot point. Older models (earlier than 1990) may have it stamped on the lower left or lower right section of the crankcase.

How to Read a Honda Motorcycle Engine Number | It Still Runs

Locate the third character. This letter or digit represents the vehicle type. Most Honda motorcycles use a "2," which refers to a motorcycle, although "A" or "1" may also be used. Locate the fourth through the eighth characters. These letters and digits are used by each individual manufacturer to identify the model or engine type of the motorcycle.

Honda Motorcycle Model Identification

All Honda engines model numbers start with the letter "G," such as "G100", "GX610", or "GXV160." This is the base engine model. The engine model and serial number should be adequate for most of your needs. However, if you need the detailed engine type, you can find an engine identification guide here.
