At the top of Hakchi2 is a drop-down menu labeled "Kernel". Click on it, and select "Uninstall". Follow the instructions in the pop up windows. Just remember if you want to completely revert back to factory, after you uninstall Hakchi2, start up your Classic and perform a factory reset in the settings (this will erase all save states on the ...

Flashing factory kernel and factory reset help on SNES ...

The hard way is to install a kernel module to add support for the TFT display that will make the console appear on the display. This is cute because you can have any program print text or draw to the framebuffer (or, say, with pygame) and Linux will take care of displaying it for you. If you don't need the console or direct framebuffer access ...

snes classic editon kernel repair - YouTube

some of your declared gems (Gemfile.lock should tell which one) depends on the unf_ext gem which uses native C extensions. you will need to somehow avoid that gem (e.g. with a platform: :mri just like you did with others) with JRuby. details depend on the problematic gem and how much of it you need, e.g. if it's only for development simply move it to a group :development and bundle --without ...

ruby - Installing JRuby gems with Mina - Stack Overflow

sudo apt-get install linux-generic If you have installed Ubuntu Desktop, then convert it to Ubuntu Studio if you like (skip it if you don't want, you can install just the kernel) sudo apt-get install ubuntustudio-* Install low latency kernel:

system installation - Is it possible to install two ...

If hakchi2 ce is asking for an update, that means you didn't actually uninstall hakchi2 before trying to install hakchi2 ce. Kernels can easily get mixed up in hakchi2 and what you think is the original may actually be an already modded kernel or the wrong kernel for your system entirely if you've hacked multiple systems.
