More than one million people in the United States are living with the neurodegenerative ravages of Parkinson's disease. This disease, which typically hits people past the age of 65, is progressive, gradually stripping away motor abilities, leaving people with a slow and awkward gait, rigid limbs, tremor, shuffling and a lack of balance.

Graham and other biomedical engineers at Johns Hopkins invented a headpiece that uses electrodes to stimulate the brains of Parkinson's patients. The STIMband device, which will begin clinical ...

Could This Head Gear Help Treat Parkinson's Disease ...

Access to primary care doctors and high quality hospitals is excellent. The percentage of people in Baltimore with health insurance is higher than national averages, meaning there should be fewer barriers to receiving care. Baltimore is home to the well-known Johns Hopkins Hospital, which has more than 1100 inpatient beds.

Best Parkinson's Disease Doctors in Baltimore, MD ...

Also, while Parkinson's patients usually respond well to levodopa or dopamine agonists, these drugs don't work — or become ineffective over time — in patients with atypical Parkinsonian disorders. The clinic that Pantelyat directs sees patients with these atypical disorders once a month at Johns Hopkins Bayview Medical Center.

To Help Patients with Atypical Parkinsonism - Johns ...

"Showing that blocking this key step in the Parthanatos pathway protected the cells against death is evidence that Parkinson's disease kills cells through this mechanism," says Tae-In Kam, Ph.D., lead author on the study and postdoctoral fellow in the Institute for Cell Engineering at the Johns Hopkins University School of Medicine.

Cell Death Pathway Tied to Parkinson's Disease | ICTR

A protein called synuclein that's involved in nerve cell communication is thought to be the culprit in causing Parkinson's disease. Now a mouse model developed by Ted Dawson, a Parkinson's disease expert at Johns Hopkins, and colleagues, shows that when aberrant synuclein is injected into the GI tract, the condition develops.
