Most new cars are fitted with an automatic choke rather than a manual one. The choke automatically opens and closes the choke butterfly (or valve) in the carburettor depending on the temperature of the engine . It may be plumbed directly into the cooling system , or linked electrically to the engine temperature sensor .

Removing the often troublesome automatic choke from your carburettor and installing this conversion kit then allows you to use a choke cable and lever. This gives a cable operated reliable choke. Everything needed to convert the choke on the carb is included in the kit, all you will need is a choke cable and lever. This product fits the following:

Stickyparts PHVA choke conversion kit

In contrast the manual choke is simply on or off, nothing inbetween ! How does an automatic choke work? Inside the automatic choke there is a small wax capsule with a heater coil wrapped around it. When the engine is started a voltage is applied to the heater and the wax heats up. As the wax begins to heat it expands and pushes the plunger out ...
