A race condition on RPC message acknowledgement in Oslo Messaging caused random RPC timeout in Ceilometer. The problem has been fixed. Now, the message acknowledgement is thread-safe and causes no Ceilometer related timeouts.

1423593 - RabbitMQ: Bad address when CONFIG_AMQP_ENABLE_SSL=y

Inspired by a great blog post by Jakub Scholz on “Scalable AMQP infrastructure using Kubernetes and Apache Qpid”, I wanted to write a post about the ongoing effort to build Messaging-as-a-Service at Red Hat. Messaging components such as the Apache Qpid Dispatch Router, ActiveMQ Artemis and Qpid scales well individually, but scaling a large deployment [...]

Messaging as a Service on OpenShift - Red Hat Developer

As an architect in the Red Hat Consulting team, I've helped countless customers with their integration challenges over the last six years. Recently, I had a few consulting gigs around Red Hat AMQ 7 Broker (the enterprise version of Apache ActiveMQ Artemis), where the requirements and outcomes were similar. That similarity made me think that the whole requirement identification process and can ...
