Verbenaceae, family of plants, in the order Lamiales, a worldwide but mainly tropical grouping of 30 genera and some 1,100 species, some of which are important for their flowers. Members of the family, sometimes known as Verbena or Vervain, have opposite or whorled leaves that are usually undivided.

Verbenaceae | plant family | Britannica

(Redirected from Indian Hyssop) Verbena hastata (American vervain, blue vervain or swamp verbena) is a flowering plant in the vervain family, Verbenaceae. It is a herb with opposite, simple leaves which have double-serrate margins, borne on stiffly erect, branching square stems. The purple flowers appear in summer.

Verbena hastata - Wikipedia

Verbena (/vərˈbiːnə./, vervain[ⓘ]) is a genus in the family Verbenaceae.It contains about 250 species of annual and perennial herbaceous or semi-woody flowering plants.The majority of the species are native to the Americas and Asia. Verbena officinalis, the common vervain or common verbena, is the type species and native to Europe.

Verbena - Wikipedia

The taxonomy of the two species of Lantana in Australia - L. camara and L. montevidensis is reviewed. Affinities and distribution are considered for the genus and for each species. A key to the species is provided and a detailed description of each species is supplemented by a habit sketch of a flowering branch and analytical drawings of the flowers and map of distribution.

Verbenaceae include several economically im- portant species used for wood, spices, and ornament. Apart from a few species of some of the largest genera (Lantana, Lippia, Priva, and Verbena) and a few small genera endemic to Africa and the Indian Ocean rim (e.g., Chascanumand Coelocarpum), Verbenaceae are New World in distribution.

A MOLECULAR PHYLOGENY AND OF VERBENACEAE 1

Taxonomy INTRODUCTION Recent phylogenetic studies, Cantino et al., (1992) have shown that numerous genera traditionally classified in Verbenaceae belong instead in Lamiaceae. Avicennia, a genus of mangrove trees, usually placed in Verbenaceae (Grandtner, 2005) or in its own family, Avicenniaceae (Boulos, 2009), has been
